**Dear Resident**

## **Pegswood Bypass – Village Improvements**

**As you will be aware the Pegswood bypass works have started. Once complete, we expect over 80% of the existing traffic to use the bypass.**

**As part of this project some minor works could be carried out to improve the main streets and help reduce the impact on the village.**

**The County Council is seeking your views and a questionnaire is attached to this letter. We are interested to know what improvements you would like within the village, or if indeed you would prefer there to be no changes.**

**For example, it has often been mentioned that improvements could be made to the parking near the Co-op, or that traffic calming should be introduced on the main roads.**

**It would be most helpful if you could complete and return the attached questionnaire, using the Freepost format on the reverse side, by 31st May 2006 or alternatively you could complete the questionnaire on our website at [www.pegswoodbypass.com](http://www.pegswoodbypass.com) and send your response via e-mail.**

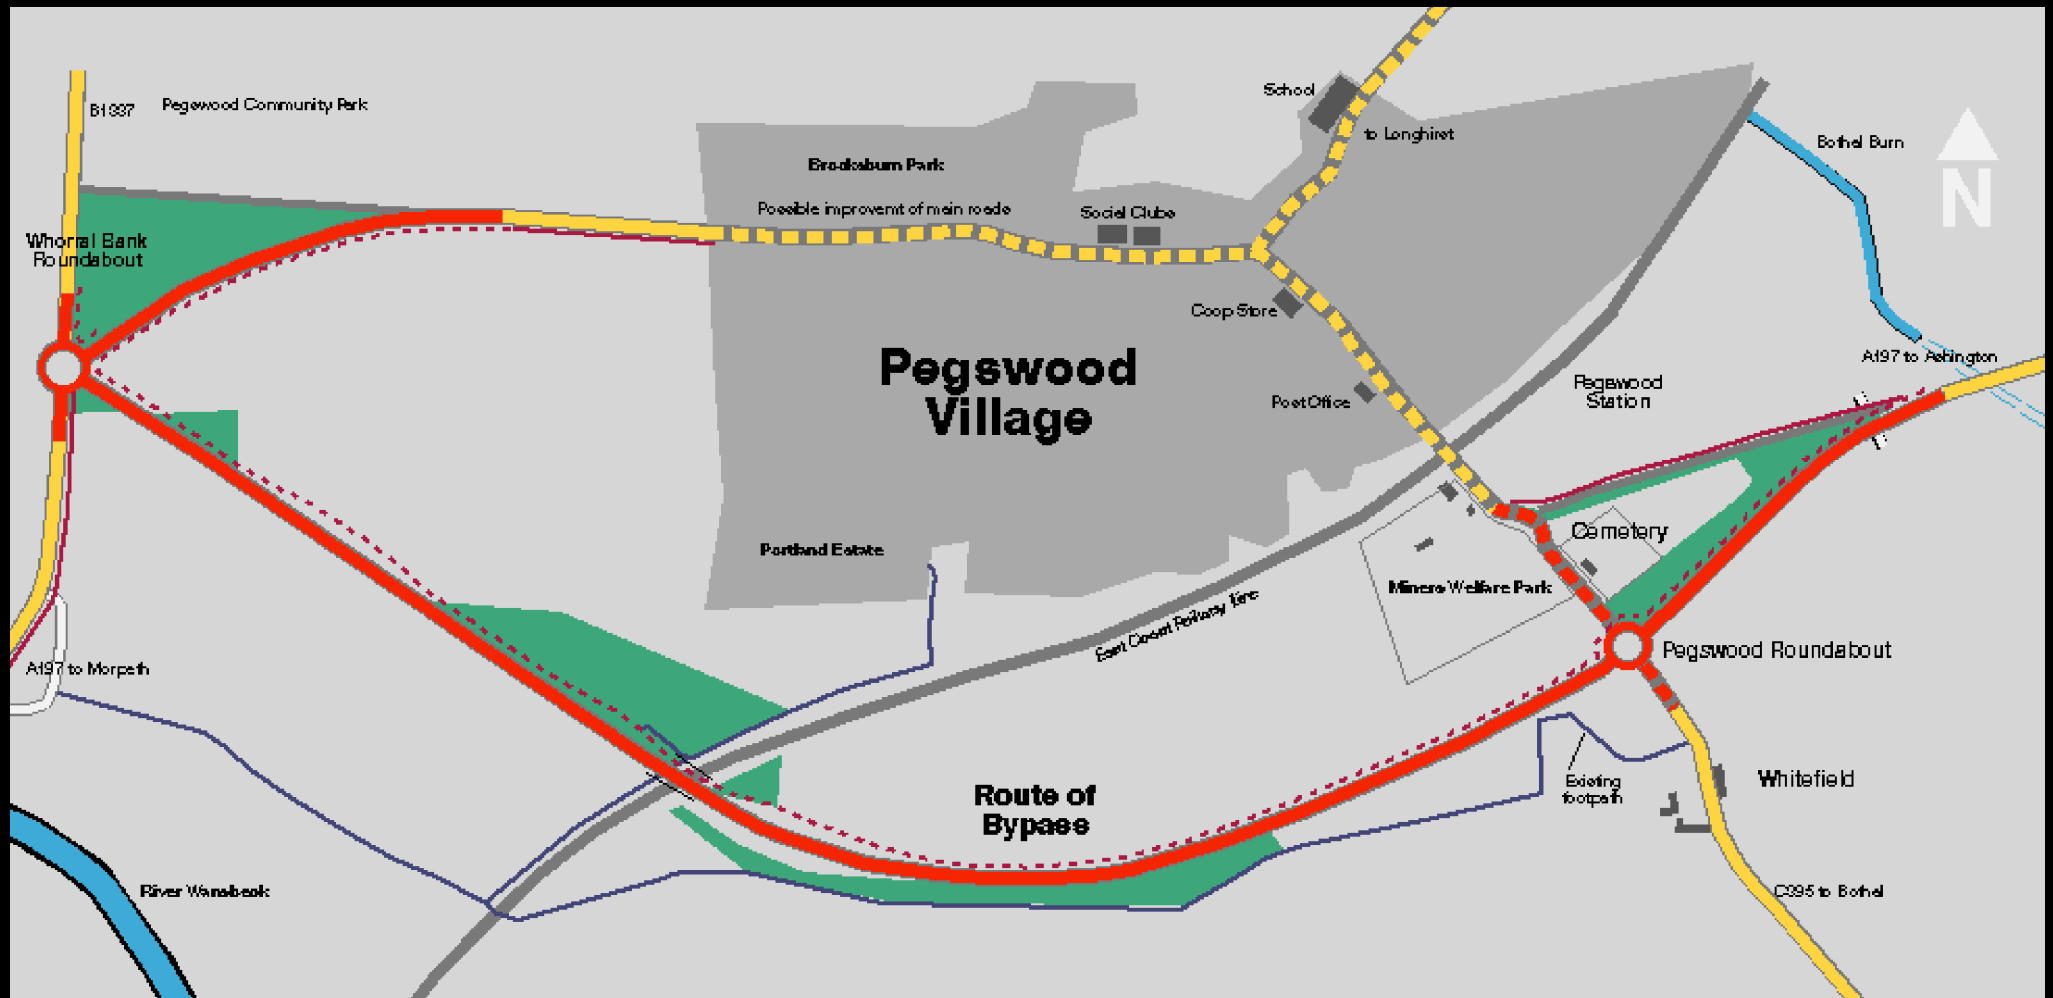

**If you have any questions and would like to find out more, please phone**

**Tel: 01670 534272 (during office hours).**
